Summary

Full-stack / backend-leaning software engineer building production systems with **Python**, **Node.js**, **PostgreSQL**, **Kafka**, **Docker**, and **Kubernetes** on **AWS**; experienced integrating **LLM agents** (Gemini function calling, MCP) into deployed products. Published NLP researcher (93.65% sentiment-analysis accuracy).

Education

University of Delhi – Faculty of Technology

2023–2027

B.Tech in Computer Science & Engineering (Specialization: AI & ML)

Experience

Software Engineer Intern

Aug 2026 – Present

Udhmodya Foundation, New Delhi, India (Hybrid)

- Architected **Jeevani**, a full-stack family health platform (React, Node.js/Express, PostgreSQL + Prisma) with a medical record vault and **Gemini API**-powered health insights, live in production.
- Integrated **Meta WhatsApp Business Cloud API** for OTP auth and automated medicine reminders on Neon PostgreSQL with JWT sessions, serving real users on a live deployment.

Software Developer Intern

Apr 2026 – May 2026

Buzzer Social Media Platform FZCO, Dubai, UAE (Remote)

- Built two production Angular SPAs (TensorFlow.js COCO-SSD detection, signal-based state) backed by **177 Vitest unit tests** in a Git-based team workflow.
- Resolved 15 code-review findings (DI refactoring, strict typing, browser-safe API patterns), improving code quality and delivery velocity.

Technical Skills

Languages:	Python, TypeScript, JavaScript, C++
Backend & AI:	Node.js, Express.js, FastAPI, REST/GraphQL, Microservices, Kafka, LLM Function Calling, MCP
Databases:	PostgreSQL, MongoDB, MySQL, Redis, Firebase
Cloud & DevOps:	AWS (EC2, RDS, S3), Docker, Kubernetes, Git, GitHub Actions, CI/CD
Frontend:	React.js, Next.js, Angular, Tailwind CSS

Projects

PayPilot – Guardrailed AI Buyer Agent

Python, FastAPI, Google Gemini, Razorpay API, SQLAlchemy, Next.js, TypeScript, MCP

May 2026 – Sep 2026

- Built an autonomous AI buyer agent using **Gemini function calling** for catalog search and order placement via the **Razorpay API**, with spending caps, category restrictions, and human-confirmation guardrails.
- Added audit logging, a real-time monitoring dashboard, and failure recovery for payment declines/stock races; exposed catalog APIs over **REST and MCP** for third-party agent use.

foodRush – Food Delivery Platform

React.js, Node.js, PostgreSQL, Redis, Kafka, Docker, Kubernetes, AWS EC2/RDS

Sep 2025 – Jan 2026

- Built a cloud-native microservices platform (API Gateway + 5 services) with JWT auth and role-based access control on **PostgreSQL**.
- Designed an **event-driven architecture with Kafka** and the Outbox Pattern, **Redis caching**, and distributed rate limiting; deployed on **Kubernetes/AWS EC2** with CI/CD via GitHub Actions.

lineCODE – Real-Time Collaborative Code Editor

React.js, Node.js, Socket.IO, MongoDB, Redis (Upstash), Monaco Editor

Dec 2024 – Apr 2025

- Implemented **Operational Transformation with Redis Pub/Sub** for conflict-free, low-latency sync across Socket.IO instances, with live cursors, invite-link RBAC, and version history.
- Integrated AI code assistance (explain, fix, improve, complete) via the OpenRouter LLM API.

Research

- **Comparative Sentiment Analysis on Twitter Data** – NLP pipeline (TF-IDF, VADER, TextBlob, SVM, Random Forest, LDA) on 61,692 tweets; **93.65% accuracy** with Random Forest, LDA surfacing key thematic clusters.
- **Hybrid Optimization for Deep Learning Training** – Hybrid optimizer combining momentum and adaptive gradients; faster, smoother convergence than vanilla SGD on MNIST.

Achievements & Leadership

- Solved **650+ DSA problems** on [LeetCode](#) (rating 1600+) and [CodeChef](#) (3*, rating 1700+); ranked 1841 in LeetCode Weekly Contest 513. **HackerRank** Ambassador.
- Selected in **ICPC Sri Lanka Regional Programming Contest**; Top 15,000 in **Google's The Big Code 2026**.
- Organized **Leader's Talk with Narayana Murthy** – managed full event coordination at Faculty of Technology.
- Volunteered at **NVIDIA Community Meetup**; participated in **GPAI India Student Community Programme**.
